

Time to ride with Arc4Health

The complete pain management and tissue repair system

#SmallWonder

arc4health

What is Arc4Health

The Arc4Health has been designed and automated to be the most consumer-friendly, drug-free, and non-invasive pain management and tissue repair system on the market today. Utilising well-evidenced microcurrent therapy, the Arc4Health – a Class IIa medical device – is an all-encompassing piece of technology, delivering over 4.6 million permutations of microcurrent sequences in one 3-hour treatment period. Microcurrent therapy is a type of electrotherapy that introduces very low-level electrical currents into the body to support and aid the body's own natural healing process.

The systemic therapy delivered by the Arc4Health is a clinically proven intervention that enables the body to normalise its own bioelectrical functions, where injury or disease have disrupted those. The Arc4Health delivers a wide range of frequencies, to stimulate the natural levels of bioelectrical activity, helping the body to heal itself better, faster, with less scar tissue.

Arc4Health Complete Kit

The Arc4Health has numerous advantages over other devices on the market, relating to its ease of use, robustness and wearability. Not only are the devices rechargeable and so fully reusable, multiple iterations and refinements of the products over the last 15 years have helped it evolve into a product that is compact and easy to use at home, without the need for clinical expertise.

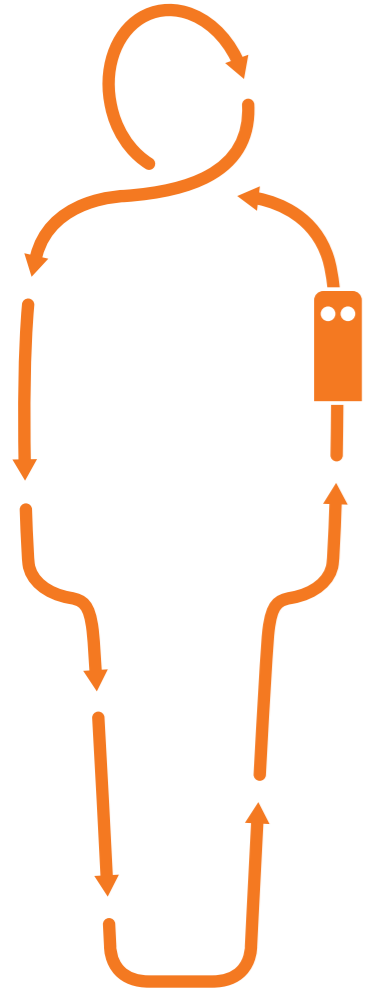

The Arc4Health complete kit contains everything you might need to get started:

-  Arc4Health Device
-  User Manual (EN, DE, FR, NL, IT, ES, PT)
-  Charger (choice of UK, EU, USA, AUS)
-  Arm Strap
-  Conductive Gel
-  Carbon Rubber and Conductive Pads

All accessory items can be purchased separately when required

What is **Microcurrent Therapy**?

Microcurrents are found naturally in the body and bioelectrical impulses are fundamental to all communications between cells, organs and tissues. The electrical currents are vital to good health – not only in humans, but in all animals.

The application of microcurrent therapy helps to facilitate the production of adenosine triphosphate (ATP), which is essential for pain management and tissue repair. Microcurrent therapy mimics the same electrical frequencies as are found in the body, and is therefore compatible with the body's own bioelectricity. This means that microcurrent therapy is 'body friendly', so does not shut down, disrupt or shock the body's endogenous systems.

Instead, microcurrent therapy helps to gently correct intercellular communication in ways that promote real healing, regeneration, and long-term pain resolution.

Although microcurrent therapy has been around for centuries in various forms, it is fast becoming accepted in mainstream medicine as a tool for treating chronic pain and injury. Microcurrent therapy is non-invasive, subsensory and entirely drug-free, and has minimal (*if any*) side effects. ARC Microtech has helped transform microcurrent therapy into a wearable health technology.

What is Arc4Health used for?

The Arc4Health has helped customers to more effectively manage pain-related conditions and promote enhanced recovery following tissue damage.

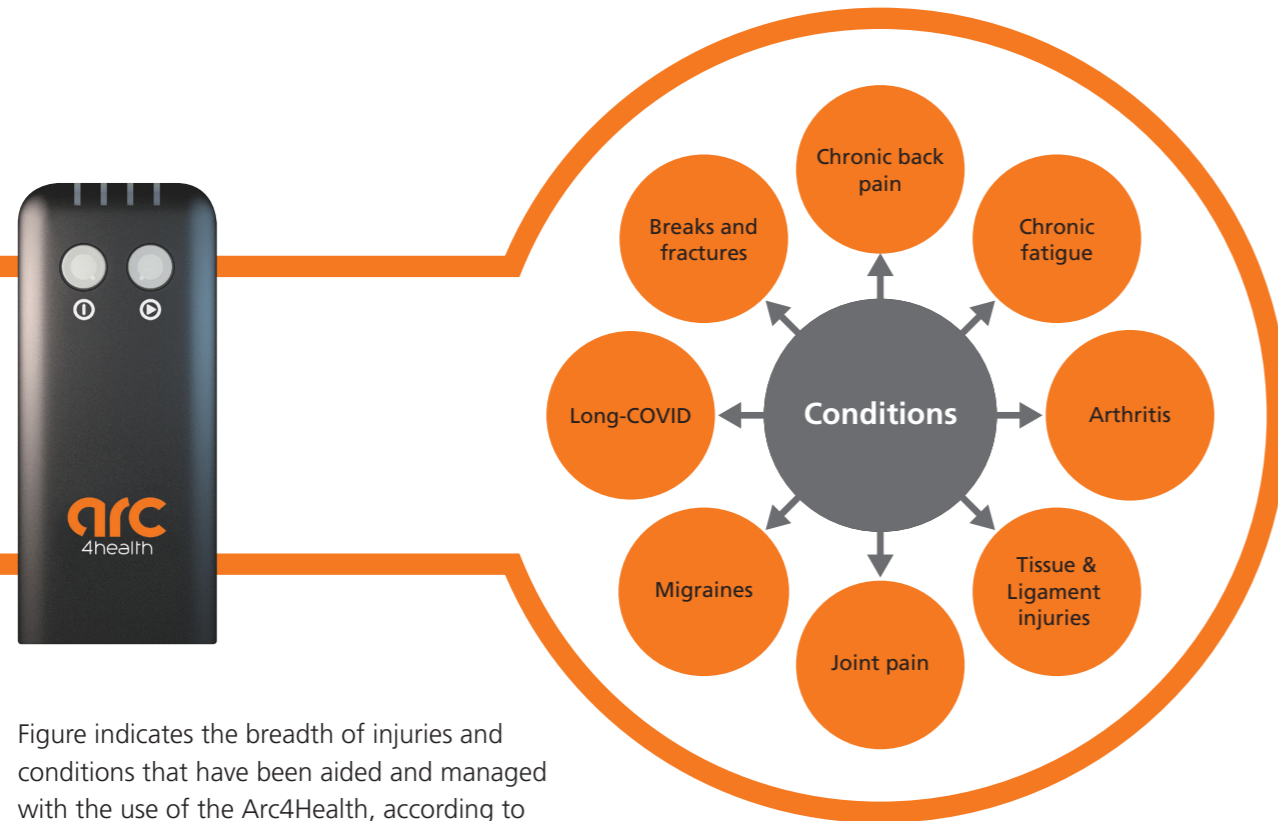

Figure indicates the breadth of injuries and conditions that have been aided and managed with the use of the Arc4Health, according to customer feedback.

Rapid Recovery

Customer reviews from Trustpilot and anecdotal findings over many years have suggested that numerous other conditions have been aided by the use of the Arc4Health device. Some of these conditions include neurodegenerative conditions (i.e., Parkinson's and dementia), neuropathic and postsurgical pain, long-COVID, mast cell activation syndrome (MCAS) and enhanced postsurgical recovery, many conditions of which have chronic underlying inflammation.

ARC Microtech is committed to showing clinical support and evidencing the benefits of the Arc4Health. This has resulted in collaborative research with the University of Greenwich and, to date, the results of two randomised clinical trials have been published in well-respected journals including the *Journal of Applied Physiology* and the *European Journal of Sport Science*.

feeling great

in no time...

Customer Reviews

I have noticed my **resting pain** has almost gone and my strength in previous movements that were painful has increased and my pain decreased. Very happy with this bit of kit. I am a Personal Trainer, so it's been such a great find for me. 10/10

I use my Arc4Health every evening without fail, I cannot recommend it enough. I have an **anxious disposition**. This device relaxes me, helps me sleep and soothes any physical symptom of stress. I really notice the difference if I don't use the device as regularly. I love it.

I would highly recommend it to everyone, but don't just take my word for it look at the research. As a lapsed scientist I am comforted that this technology is backed up by **solid scientific research** into the effects of microcurrents on a cellular level.

I truly believe you can benefit from this product. I'm not naive to think it's going to be a quick fix for everyone, however, a positive approach, belief in your ability to heal and an open mind to the possibilities will certainly assist the process. Thank you Arc4Health for providing us with this **magical piece of technology**, I love it.

As a functional medicine doctor with **long-COVID** and quite severe MCAS, I strongly recommend the Arc4Health. I've only been using it for a couple of weeks and my MCAS, body pain and fatigue have improved a lot.

Brilliant service, and incredible product. It has helped me so much, I would not be without it.

The machine was recommended to me by someone who is having amazing results, I am pleased to say I am also noticing a difference after week 2! It is very easy to use. The company are very helpful and quick to get back to you with any questions.

An amazing piece of kit that everyone needs in their family first aid kit.

Thank you Arc4Health - this easy to use, neat piece of technology has really helped ease my **long-COVID fatigue and post-exertional malaise**. Within days of starting to use it I discovered that I wasn't crashing as often/as deeply, and for as long. Thank you!

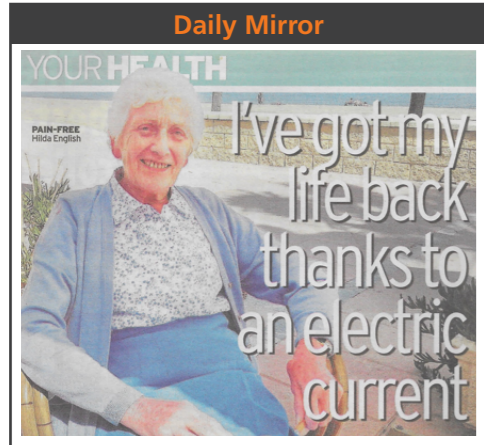

*I've been using the Arc for a few days, and I have to say, I've noticed a huge difference in ways I wasn't even expecting. I've had a **spinal fusion** for 28 years, and it now feels the best it has ever felt in all that time. Reduced pain, and the muscles around the fusion are more relaxed. Additionally, I have **more energy and reduced brain fog**, and find it much easier to focus.*

Extremely good customer service, the product itself is amazing, cannot recommend highly enough. **Long-COVID, polymyalgia, huge difference with pain** and so easy to use.

Press Coverage

Ultimate Tool

- ▶ 2-year warranty
- ▶ Affordable
- ▶ All accessory items sold separately
- ▶ Class IIa medical device
- ▶ Drug-free
- ▶ Easy to use - four automated programmes operated using two buttons!
- ▶ Ergonomic delivery mechanism
- ▶ Made in the UK
- ▶ Multiple payment options available, including 0% credit
- ▶ Non-invasive
- ▶ Rechargeable – high-capacity battery
- ▶ Wearable
- ▶ Well-evidenced
- ▶ Most importantly... IT WORKS!

Ultimate Team

ARC Microtech has been built on family values and prides itself on its ethical, customer centric ethos. The Team is passionate, all of whom have seen first-hand the many benefits gained from using microcurrent therapy.

Dedicated customer service is always available to provide ongoing support and advice.
